Awnings Patio roofs Glasoasen®

Make the most of uncovered or unused outdoor space

PUBS, BARS, RESTAURANTS & CAFÉS

Whether adding sun protection to an outdoor seating area, protecting your customers from inclement weather or extending your restaurant space. The addition of a weather product can make your customers feel at home. Sign-writing options also make the products perfect for advertising.

HOTELS

Offer your guests a comfortable environment that they can use around the clock whether having breakfast outside on a spring morning, a drink before dinner, or enjoying a relaxing afternoon. The addition of heating or LED lighting makes the most comfortable of places even more usable.

SHOPS

The most traditional form of shading, weather protection and advertising for the high street. Shops use awnings to protect from sunlight and glare, to protect stock in the shop window – from fresh produce to expensive furniture. The addition of sign writing to the valance or main cover adds an extra message to your customers.

EDUCATION

From protecting young children from dangerous sunlight to giving them a sheltered spot to play outside when it is raining, weather outdoor living products can make it so much easier to enjoy the outdoors.

weinor Awnings – the perfect add-on for your establishment

weinor offers you the perfect individual, German-engineered awning for commercial applications. 47 RAL powder coating colours plus 9 WiGa trend colours free of charge will match your corporate colour scheme and all-round appearance. Optional signwriting on valances and/or the main cover will get your brand seen everywhere. The outside room you create will add further turnover to your business immediately. A good decision either way: a weinor solution for your commercial establishment.

weinor Semina, the perfect heavy-duty awning for almost any kind of installation

weinor awnings

Integrated LED lighting for long evenings on the patio

weinor LED casts an atmospheric, warm white light for even longer hours of enjoyment on the patio.

- patent-pending LED spotlights
- operating life of 30,000 hours

- highly energy efficient
- infinitely dimmable when used with BiConnect radio control
- can be used even when awning is retracted

Tempura heating system – cosy warmth on cooler days

Pleasant, instant heat without any pre-heating: the energy-efficient Tempura infrared heater delivers a heat output of over

1,500 watts. Very easy to operate and dim using the weinor radio control.

High-performance technology in the smallest of spaces

Fully sheltered: inside the cassette is the very latest in weinor awning technology.

- durable and very quiet weinor LongLife arm (10-year warranty)
- 100,000 cycles in a fatigue test – no wear and tear
- drop-forged aluminium in arm joint
- torsion-resistant roller tube

New!

PERGOTEX II – versatile weather protection under a folding roof

The flexible weinor PergoTex II folding roof turns your patio into a variable environment with a Mediterranean feel. When it is open, you enjoy pure fun in the sun, as if in an open-top car. When closed, it filters out the sunlight and provides UV protection. And as a rain roof, it even resists a downpour. Thanks to the self-supporting design, it even readily copes with strong winds. The PVC fabric is resistant to tearing, light and rain and can be extended and retracted to any length with the help of a motor.

weinor
pergola awnings

PergoTex II – the folding roof combines weather protection with the enjoyment of basking in the sun

Sturdy roof construction – wind and rain resistant

The tear-resistant PVC of the PergoTex II is fastened to robust aluminium transoms. This combination withstands wind strengths of up to 8 (Beaufort) – even when the folding roof is extended.

- controlled drainage of rainwater with a minimum pitch of 8°
- the fabric is extended with lateral guidance – due to a robust counterbalance system

Controlled water drainage – for optimal rain protection

When fully extended, the front transom is located directly above the guttering to provide controlled water drainage.

- transparent heavy duty PVC lip to guide dripping water away
- guides water neatly into the gutter and the drain integrated in the post

Image supplied by Awnings Scotland

Modular system – better weather protection, even easier to use

Easy to add or even retro fit additional elements to the PergoTex II system

- all-glass glazing elements
- vertical awnings such as VertiTex
- light, heating, remote control

PLAZA PRO – the systematic textile patio roof

Cosy and sturdy, with modular additional elements: the weinor Plaza Pro is your retractable textile patio roof for many commercial applications, from alfresco dining to schools or nurseries. When there is too much sun or wind, the extendable textile roof provides reliable protection. From a pitch of 14°, the Plaza Pro can also be used to reliably protect against rain. It can be closed off on every side using vertical glass elements or shades for even greater protection and comfort.

Plaza Pro provides high wind stability.

Large-scale retractable fabric roof – for heavier and longer use

A professional all-rounder – the Plaza Pro textile patio roof leaves a positive impression with its particularly stable, windproof construction and its suitability for large-scale units.

- extensive multi-section units are possible
- outstanding design, winner of the iF design award in 2011

Stable crossbeams – for wind stability, keep fabric in place

A strong crossbeam provides maximum stability between the two posts. It makes the textile patio roof particularly resistant to wind.

- ideal fabric tensioning due to inclusion of crossbeam
- can be installed with side awnings and vertical all-glass elements

Sun protection with highly innovative tensioning system

There are many advantages to the tensioning system:

- taut fabric whatever the fabric size or wind angle
- stable even in side winds

DUOFIX – Free-standing and eye-catching

The weinor Duofix construction provides you with a free-standing combinable unit for weinor products. You can create your outside area underneath this unit, which will have a direct impact on your sales. You can combine the Duofix with the weinor Topas or Opal Design/LED awnings or with the weinor Plaza Pro or PergoTex II textile roofs. With 47 RAL colours plus 9 WiGa trend colours and over 200 fabrics to choose from, you will always find the perfect match for your corporate colour scheme.

Duofix – sheltered outside areas increase revenue opportunities

Free-standing, without wall or floor fixings

The weinor Duofix provides the easiest setup ever. You can choose different types of fixings to per-

fectly match your needs. Be it screw-in base plates, concrete foundations or stone baskets.

More comfort with Tempura heating system and LED lighting

Increase the comfort factor for your guests with the latest generation of dimmable LED lights and infrared Tempura heating elements. You can extend your outdoor season for your guests. A strong crossbeam provides maximum stability between the

two posts. It makes the textile patio roof particularly wind resistant.

- ideal fabric tensioning due to inclusion of crossbeam
- can be installed with side awnings and vertical all-glass elements (on Plaza or PergoTex II versions)

With awning or textile patio roof

weinor pre-mounts all fixings for the products before delivery. This cuts down on the installation time and ensures that everything

is in the right place. So, all you have to do is choose your perfect combination of products.

weinor Glasosase® in combination
with Plaza Home – the ultimate solution!

PATIO ROOF & GLASOASE®

The all-inclusive solution

weinor Terrazza and Glasosase® will provide you with the all-inclusive solution for your outside area. The well-engineered glass and aluminium construction from weinor. This modular system allows you to decide what features to show: all-around sliding glass door elements, textile sun protection, LED light bars, infrared heating. Your customers will love the comfort and cosiness factor under your weinor glass roof.

The weinor patio roof Terrazza leaves a great impression due to its high durability and well-engineered design

Easy to open: convenient and user-friendly

The easy-glide sliding door is outstandingly easy to operate.

- very user-friendly all-glass elements

- sliding the panels is a breeze
- exceptionally smooth operation
- foot-operated lock on the inside – no need to bend over

Fits under any patio roof

Being a vertical structure, weinor's easy-glide all-glass sliding door fits under virtually every patio roof as well as numerous roof structures.

- no additional costs for structural safety adjustments
- trouble-free cleaning due to easy access from the outside

Maximum transparency and premium weather protection

Fully unrestricted panoramic view:

- no vertical frames between the panels

- significant noise reduction
- structural safety calculations performed by certified engineering firm

Corporate colours

56 frame colours as standard, over 200 available

Our range of frame colours is so diverse that you will always find a shade that harmonises with the existing architecture: choose from more than 200 colours!

weinor provides a maximum degree of uniformity

As weinor does all the powder coating in house, you can also rest assured that different products come with the same top-class colour tonality and identical gloss level.

Choose from an abundance of high-quality colours:

- 47 standard RAL frame colours, silk gloss
- 9 scratchproof, resistant WiGa trend colours with an elegant textured look
- over 150 additional RAL colours available

47 standard RAL frame colours, silk gloss

9 scratchproof, resistant trend colours with an elegant textured look

weinor is an eco-friendly company. To ensure compliance with high environmental standards, manufacturing processes and materials undergo regular testing by experts. As a result of the ban on the use of heavy metals in powder coatings, paint manufacturers can no longer guarantee colour stability despite making every effort

to do so. It therefore cannot be excluded that colours in general, and Fire Red (RAL 3000) in particular, may fade with time. Colours may differ significantly due to the printing process.

Visually stunning fabrics

Technical brilliance and performance

Whether you decide on a wall-mounted folding arm awning, Plaza or PergoTex II, or a roof or under-mounted awning to match a Terrazza and Glasoase®. The extensive range of fabrics available from weinor will perfectly complement the finished environment. weinor fabrics are coated with Teflon EXTREME®, making them both water and dirt repellant. As the colour pigments are spinneret-dyed into the basic fibres, the fabrics maintain their brilliant colour throughout.

colours by weinor®

true colours
Acrylic fabric collection

weinor true colours is our exquisitely colourful acrylic fabric collection. The fabrics are outstandingly durable and come in radiant colours – for beautiful patterns designed to last.

magic colours
WeTex polyester fabric collection

The hallmark of weinor magic colours is its vibrant patterns and high-stretch polyester which retracts to its original smooth state in warm conditions (weinor Memory-Effekt®).

Perluca
Acrylic climatic-control fabric for vertical blinds and awnings

weinor Perluca, the fabric collection with breaks arranged at regular intervals, offers airy sun protection and privacy.

Soltis®
High-tech climatic-control fabric for vertical blinds and awnings

The Soltis® high-tech fabric was designed by Serge Ferrari® and its micro-pores make it especially air-permeable.

Use your awning as advertising space

Large awning fabrics invite you to use them as advertising space, weinor will help you find the perfect required match, be it your company logo or just lettering. A high range of colourful fabrics will help to set the right contrast.

Image supplied by Garage Door Connection

The awning hardware and valance can be chosen in your required colour combination. A large print can be provided on your pre-layout. You will then receive the complete unit.

Image supplied by Radiant Blinds

If you wish you can choose from far more than our 47 RAL colours plus 9 WiGa trend colours. To get the perfect match for your CI, simply select the desired colour from our range of 200 plus RAL colours for a small extra fee.

The awning hardware and valance can be chosen in your required colour combination. A large print can be provided on your pre-layout. You will then receive the complete unit.

weinor visualisation service an aid to decision-making

Give yourself peace of mind: use weinor's visualisation service to show what a patio roof or Glasoase® could look like on your building!

The high-quality weinor visualisation is a photorealistic image created by our specialists. You can see how attractive your weinor product looks and that it is exactly how you want it to turn out.

With weinor visualisation, a computer program renders 3D images of your existing patio environment and adds a weinor product. Use weinor visualisation to make that all-important decision to purchase your own product.

Ask your retailer about this weinor service!

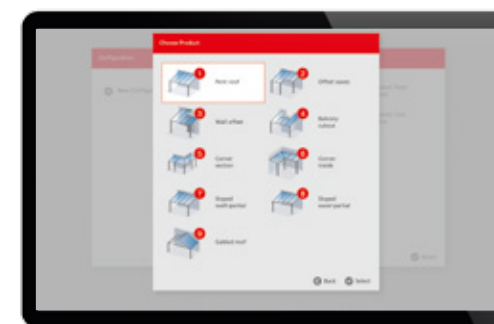

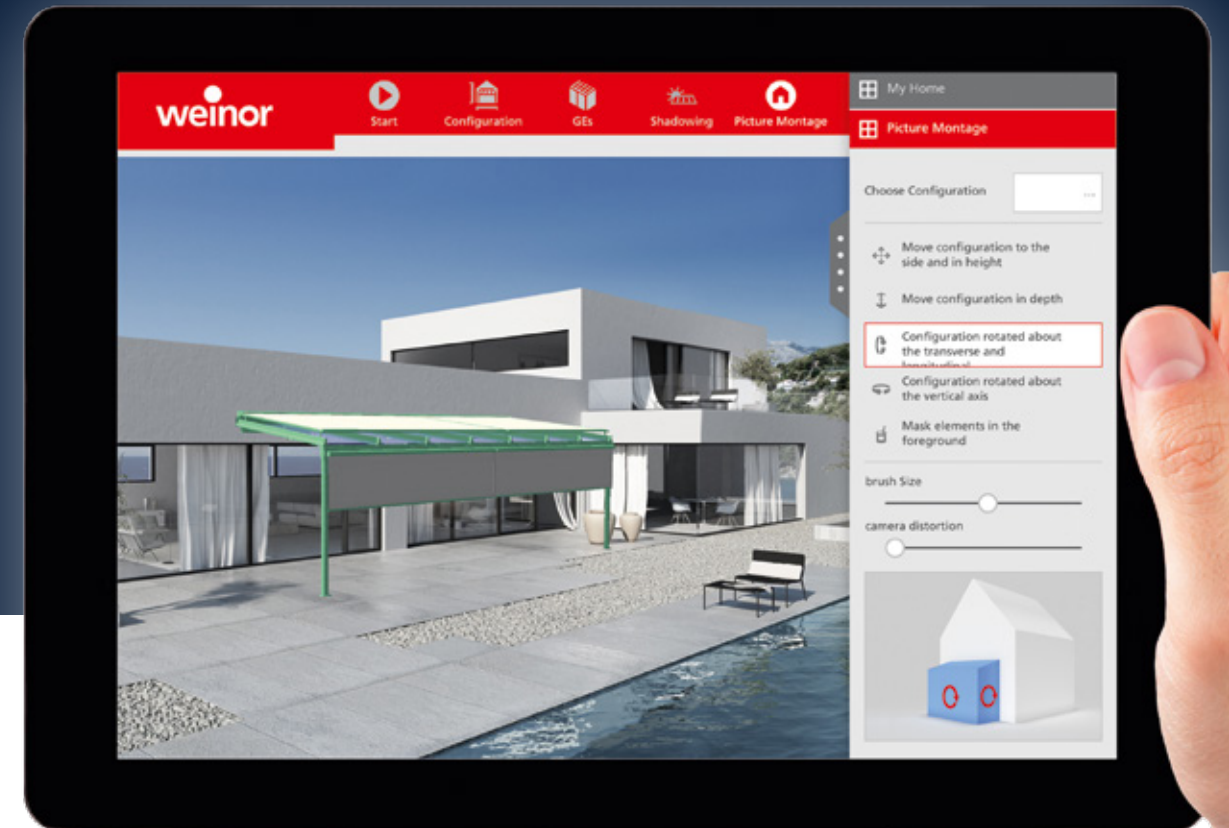

Visualisation – the finished impression

The building before-hand

weinor 3D Designer Product planning made easy

3D Designer: wide range of roof shape options

More and more weinor customers are impressed by the 3D Designer. With this tool the planned Terrazza or Glasoase® including conservatory awning, vertical shading and glass glazing elements can be displayed three dimensionally on a computer or tablet. As a result, an accurate impression of the finished product can be provided at a very early stage – fully demonstrating how it will look. Note: The previous product configurator WeiCad is being discontinued and will be replaced by the 3D Designer.

Example Terrazza original

We reserve the right to make technical changes. For technical reasons, the colours may appear slightly different when printed.

Quality made in Germany

High-end solutions in design and technology, premium quality and a reliable, dedicated service – weinor is one of the most innovative companies in the sun protection market and has been an innovative leader for all kinds of patio systems for more than 50 years.

Important:

For textile sun protection: creases occur during manufacture and when folding the awning fabrics. This can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the hem, seam and fabric lengths occur where there are multiple layers of the woven fabric and different rolling thicknesses on the fabric roller. The resulting

fabric tension can cause waviness (e.g. honeycomb or fish bone patterns). In principle, these effects occur to varying degrees in almost all awning fabrics. Creases and folds do not detract from the value and usability of an awning. Awnings and conservatory awnings are sun protection devices which should be retracted when it is raining or windy. Wet fabric creases more easily and as

far as possible should only be retracted after drying out (please take care in strong winds and avoid pooling). Depending on the colour of the ordered frame, we supply all small parts as well as crank handles and gear boxes for systems with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).
